Profile

Information Security student at the Technical University of Moldova, developing skills in software development, cybersecurity and digital design through university studies and personal projects. Hands-on experience designing interfaces in Figma and implementing a responsive React frontend.

Education

Information Security

Technical University of Moldova | 2026 - Present

Faculty of Computers, Informatics and Microelectronics (FCIM)

Languages & tools.

Programming	Python, C, JavaScript, TypeScript
Frontend	React, HTML, CSS, JSX
Databases	SQL
Development tools	Git, GitHub, VS Code, Vite
Design	Figma, UI Design, Interface Prototyping

Selected project

ASOS-inspired E-commerce Website

Personal frontend project | UI Design & Frontend Development

- Designed the storefront interface in Figma and implemented it in React using JavaScript, JSX, CSS and Vite, with Codex as an AI development assistant.
- Created responsive layouts, fashion categories and an interactive product carousel, with catalog search and product detail dialogs.
- Implemented saved items and a shopping bag with local browser persistence. Frontend-only project; no custom backend or checkout system.
